## 6.1 Franchise Population by Availability of Renewal Option

### Description

*Pie Chart:* Chart 6.1 displays the Franchise Population according to whether or not the franchisor offers a renewal opportunity after the initial term of the franchise. The slices of the pie chart represent how many franchisors either grant (91%) or do not grant (9%) a renewal option.

*Bar Graph:* The bar graph breaks down the availability of renewal options by industry category.

### Methodology

The data for this chart was collected from Item 17b of the UFOC. If there was an opportunity to renew after the initial term of the franchise, FRANDATA's database tracks both the number of terms and the length of time associated with those terms. Perpetual initial terms were not counted as having a renewal option.

### Selected Findings

- 1) 91% of the franchisors in the Franchise Population offer the opportunity to renew after the initial term.
- 2) 100% of the Business-related (BUSN), Education (EDUC), Personnel (PERS), Printing (PRNT), and Travel (TRAV) industries offer the opportunities to renew after the initial term.
- 3) At 33%, the Lodging Industry (LODG) has the lowest percentage of systems offering the opportunity to renew after the initial term.

**Note 1: There were 23 systems with a perpetual initial term. The highest percentage of perpetual initial term (22% of those with perpetual initial term) occurred in Retail Industry (RETL).**

## 6.1 Franchise Population by Availability of Renewal Option

### Description

*Bar graph:* The bar graph on the opposite page depicts the percentage change in franchise population from 1997 to 1998 by industry category. The chart found below contains the source data from which the graph was created.

Positive percentages under "yes" represent an increase in the number of systems offering a renewal option in 1998. Conversely, negative percentages under "yes" represent a decrease in the number of systems offering a renewal option in 1998. Data is presented by the 18 Industry Categories and by the total Franchise Population (delineated in the "Total" category)

	No	Yes	Total
AUTO	7.0%	-7.0%	0.0%
BAKE	4.0%	-4.0%	0.0%

Total	1.7%	-1.7%	0.0%

In reviewing this data, it is important to understand that the Franchise Population from which the data was drawn in Volume III of the **Profile** is not identical to the Franchise Population which was used to collect data for Volume II of the **Profile** (see Chapter V and Appendix B). In fact, only 75% of the systems in Volume III of **Profile** were also in Volume II of the **Profile**. Therefore, large fluctuations in variances may be directly attributable to a change in population within a particular industry group, rather than to any real change in that industry. Please use caution when drawing conclusions from these results.

### 6.1 Franchise Population by Availability of Renewal Option

## 6.2 Average Length of Original and Renewal Terms

### Description

*Bar Graph:* Graph 6.2 compares the average length of the original and renewal franchise terms by industry category. One bar represents the average original term of all systems within each industry category (defined in years), and the other bar represents the average term of one renewal period for all systems within each industry category.

### Methodology

The data for this chart was collected from Items 17a and 17b of the UFOC. After each system's original term length, and the renewal period for one renewal term, were established: (1) the initial terms were added together with the rest of the companies in the same industry category and divided by the number of systems; and, (2) the renewal periods for one term were added together with the rest of the companies in the same industry category and divided by the number of systems.

### Selected Findings

- 1) The average initial term for the Franchise Population is 10.3 years.
- 2) The average renewal term for the Franchise Population is 8.2 years.
- 3) The Printing Industry (PRNT) offers both the longest average initial term (18.6 years), and the longest average renewal term (17.5 years).
- 4) The Travel Industry (TRAV) offers both the shortest average initial term (5.7 years) and the shortest renewal term (5.0 years).
